

## WARRANTY INFORMATION

Power-Sonic Batteries are warranted throughout Australia against faulty Workmanship and materials. Depending on the battery and application the amount of time covered varies.

If a Power-Sonic Battery is defective (other than for the warranty exclusions specified on card) during that period, we will replace or repair it at our cost. The warranty period is not renewed or extended as a result of this replacement. To make a claim, please return the part to the place of purchase. Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality. The benefits under this warranty are in addition to other rights and remedies you may have at law.

**Warranty Conditions-** This warranty does not cover – Normal wear and tear, Labour for removal and replacement of the unit unless prior written approval has been obtained from Powerhouse Batteries, Transportation costs to and from the place of purchase or stockist, Parts which have been subjected to deliberate abuse, conditions resulting from abnormal wear, negligence, alterations or accidents, Incorrect fitment, Parts used in an incorrect application or parts that are not used for their intended purpose.

How do I make a claim? in the first instance contact the place of purchase.

## WARRANTY EXCLUSIONS

This warranty does not apply to batteries that break or fail due to abuse or neglect such as:

Incorrect or under specified battery type fitted to vehicle/applications.

Charge system problem/incorrect charging, overcharging or undercharging situation. Prolonged storage of the car or very minimal use.

Deep discharge applications (Heavy accessory loads etc).

Electrical Faults, shorts, excessive loads and loose wiring.

Damage to the battery caused by the consumer or other in-car and/or application fault.

Any Battery modifications such as acid additives, lead terminal changes or any other contaminates.

**To verify a warranty claim, the battery must be fully charged prior to adjudication. A flat (Discharged) or sulphated battery is not considered to be a manufacturing defect and is not covered under this warranty.**

### Battery Tip For Extended Life

Clean Terminals regularly for corrosion and make sure terminals are tight and battery secure.

Keep battery fully charged and start car regularly.

Take advantage of our Free In-store Battery & Alternator Diagnosis.

## Replacing Your Battery

- Interruptions to the power supply may cause electrical devices to malfunction.
- Only install batteries that have been sufficiently charged with a minimum terminal voltage of 12.5V.
- Switch off the engine and all electrical devices prior to removing the battery.
- When removing the battery:
- Disconnect the negative battery before the positive battery.
- Never lift a battery by the terminal posts.
- Always lift the battery by the bottom or by the handles.
- The old battery may be contaminated with residual sulphuric acid.
- Check the battery compartment for corrosions.
- Also thoroughly inspect the brackets for rust and damage. Clean the battery compartment and repair as necessary. Corrosion in the area of the battery can indicate leaked battery acid. In this case a workshop should investigate the reason for this.
- Clean the battery terminals and terminal connectors, as this causes increased contact resistance.
- Take care that the battery is properly seated on installation.
- Tighten the hold down clamps.
- When installing the battery, connect the positive terminal before the negative terminal. Ensure that the terminal clamps are firmly fitted in order to eliminate contact interruptions due to vibrations.

Please attach your Invoice Receipt below and keep in your glovebox.
